

48V-24V Converter Software v1.02

Alpha and Outback Energy GmbH is pleased to announce the release of our newest firmware upgrade for the CXDF 48V-24V 2kW.

New Features and Improvements:

- Removed the Fan Speed Alarm because it was sensitive to environmental conditions (altitude and temperature) and could generate an intermittent false alarm. This alarm was also incorrectly reported as an Unknown Alarm in CXC v2.21 and earlier.

Compatibility:

- This software can be loaded on any CXDF 48V-24V 2kW.
- The CXDF 48V-24V 2kW can be used in any system of any version (CXC or CXC HP).

Upgrade procedures using the Web Browser:

1. Navigate to the Upgrade Firmware menu under the System information menu.
2. Click Browse.
3. Select "034-131-20_X_CUSTOMER_CXDF_48-24-2kW_VXXXX.acan" from where the file is located.
4. Click Submit.
5. Once firmware is loaded into the CXC, select the devices to be upgraded and click Perform Upgrade.
6. The selected Converter will upgrade one by one.

You have now successfully upgraded your converters. Thank you for choosing Alpha and Outback Energy GmbH.
